

EMCEL CAD Capabilities

EMCEL design and manufacturer an extensive range of filters to suit all applications. Within this remit we have experienced engineers designing and drawing your filters to ensure the best possible quality and levels of filtration for your needs.

MCAD @ Emcel

Emcel Filters have two seats of Autodesk Product Design Suit Premium & Two seats of Autodesk Inventor LT Suite.

The Product Design Suit package includes 3D modelling within 'Inventor', Photo realistic rendering within 'Showcase' & '3ds Max' to show the completed design before the first metal is cut as well as AutoCAD for standard 2D drafting.

'Inventor' allows the Import & Export of Industry standard file formats such as .STEP, .SAT & .IGES as well as other MCAD native formats for data inter-change.
